PROJECT:

TITLE : Watch Dog timer

TECHNOLOGIES: Arduino IDE

DESCRIPTION : Watch dog timer is device which can be used in both software and hard ware. This watch dog timer can be used to automatically detect software anomalies and reset the processor if any occur. Generally a watch dog timer is based on counter that counts from some initial value to zero. Each time main program reset the timer. If any case the main program does not get back to reset the timer, then watch dog timer will resend reset signal to the controller and then controller starts restarting from the main and initialisation will also happen likewise the watch dog timer works.

ROLE : Lead the team and plays a major role in completion of project successfully.
